

Membership Agreement For TRC's ACT Fleet Forum

A Fleet-Only Educational Network

WWW.ACTFLEETFORUM.COM

Managed by:

In Partnership with:

The ACT Fleet Forum brings together leading fleets who use advanced, clean technologies. Members learn from each other and exclusive technology previews via web discussions and workshops.

MEMBERS JOIN REGULAR DISCUSSIONS WITH THESE LEADING FLEETS:

...AND MORE LIKE YOU JOINING EVERY DAY.

WHO BENEFITS FROM ACT FLEET FORUM:

Chief Technology Officers, Chief Operating Officers, Fleet Managers, Maintenance Managers, Sustainability Teams, Innovation Leaders, Fleet Service Teams, etc.

More than 70 percent of representatives are Director or above.

HOW FLEETS BENEFIT:

Regular Best Practices Discussions

Discussion with fleets who have integrated the latest clean and advanced technologies. Minimum ten (10) web discussions on cutting edge topics. Regular fleet-only best practice sharing discussions on new technology.

Hands-on Workshops

Exclusive visits or virtual events of fleet and vendor facilities to see the first and largest deployments of cutting-edge advanced clean vehicle technologies.

Complimentary ACT Expo Participation

Passes to join more than 2,700 fleet managers and thousands of industry experts at the largest clean fleet event in North America.

Regulatory and Funding Updates

Regular updates on policies impacting fleets and funding opportunities to adopt clean technology. Access to TRC policy and funding experts for Q&A.

24/7 Access to Lessons Learned

Exclusive access to recordings, briefs on lessons learned, and slides from all previous discussions and workshops. Includes schedule of upcoming discussions to share with colleagues.

HIGHLIGHTS FROM OUR FIRST FIVE YEARS

Lessons and tech preview discussions on:

- Total Cost of Ownership (TCO) • MHD Electric Vehicles
 - Utility Charging Programs • AFV End of Life
 - State of Fuel Cells • CNG Best Practice
- Using RNG • CARB's ACF Rule • South Coast's ISR Rule
- Heavy Duty Hydrogen Demo • Hydrogen Outlook • Wireless Charging
- California's Low Carbon Fuel Standard (LCFS)
- Microgrid Projects • Charging Management Best Practice
- Visit to Heavy-Duty Hydrogen Station • Megawatt Charging Standard
- Public Fast Charging • Renewable Diesel • Electric TRUs

As an ACT Fleet Forum member, you can search a library of all past and future slides, briefs, and recordings on these topics.

PREVIOUS DISCUSSIONS AND WORKSHOPS (50+)

All slides, recordings, and lessons learned briefs are saved on the member-only online library including these highlights:

Workshop: PepsiCo's Near-Zero Emission Facility

Visit one of the country's first near-zero fleet facilities with technologies from Tesla and other leading OEMs and infrastructure providers.

Drop-in Charging Options

Learn about the new emerging solutions for drop-in charging that reduce time / cost and increase convenience for leased and owned properties.

Leasing and Landlord Troubleshooting for EV Infrastructure

A discussion with a warehouse leader about how to work with landlords of leased properties to troubleshoot charging and other clean technology infrastructure installation.

EPA's Clean Trucks Plan: Understanding Potential Impacts on New Trucks

Learn about the most important fleet operational and maintenance implications of ultra-low-NOx regulations for diesel engines.

Workshop: Scaling Zero-Emission Vehicle Fleets

Early adopter fleet and technology expert discussions on piloting – then scaling – two zero-emission heavy-duty vehicle types: battery electric vehicles and hydrogen fuel cell vehicles.

Markets for Battery Resale, Reuse, Recycling

Discuss current and developing resale opportunities for vehicle batteries with a leading reseller and fleets with experience in battery recycling.

First Fuel Cell Electric Vehicle Deployments

Visit a hydrogen fueling station for Class 8 demonstrations at the Port of Long Beach, CA to learn about the state of the technology and outlook. Hear first-hand from fleets with experience on benefits and challenges.

2024-2025 EVENT CALENDAR

Workshops: Travel Planning Required.

Hydrogen Trucks on Roads Today and Tomorrow & Systems Integration & Management for BEV Acceleration.

Modular, Mobile, and Temporary Charging Systems

9/26/2024

Technology overview from a leading provider, with case studies for fleets in need of temporary and modular charging systems across owned and leased real estate portfolios.

Hydrogen Trucks on Roads Today and Tomorrow

10/22/2024

In-person workshop with hydrogen fleet operator, fueling and infrastructure providers and their partners on today's solutions for refueling with hydrogen.

Charging Away from the Depot

10/24/2024

Review of unique charging solutions, timing considerations, and rental options to be incorporated into nearby depot operations.

US Election Implications for Fleets

11/21/2024

Hear perspective from TRC's policy and compliance experts on implications for national and California regulations from the U.S. federal election results.

Depot Charging Deep Dive

1/23/2025

Detailed data review and individual conversations with nine (9) leading charging infrastructure developers.

Hydrogen Market Outlook; From Federal Planning to OEM Production

2/20/2025

Conversation with a hydrogen technology leader on the developing market and outlook for hydrogen production, vehicles, and early fuel cell deployments.

Carbon & GHG Accounting for Renewable Fuels

3/20/2025

Overview of carbon accounting practices to maximize the emissions-reductions benefits of renewable fuels, including carbon-negative fuels.

Systems Integration & Management for BEV Acceleration Late March TBD

In-person workshop with early adopter fleets and technology partners in Denver-area on planning and managing complex battery electric vehicle projects. Learn to manage hardware/software integrations, larger project plans, and identify local partners.

Next Generation eTRU Market

4/10/2025

Detailed overview of the TRU technology market, CARB regulations, and the rapid advancement of TRU technology by major providers.

EV Best Practice: Leased Property Infrastructure Development 5/22/2025

Best practices discussion across fleets and regions to understand decision-making on clean infrastructure investments with leased real estate assets.

Corridor Refueling with RNG and RD

6/19/2025

Fuel specific conversation around RNG and RD network refueling potential along major US transportation corridors.

Medium-Duty Focus: Class 6 and Mid-City Logistics

7/24/2025

Discussion with a leading developer of battery-electric-medium-duty vehicles for use in local and last mile operations, including routing, range, and refueling situations.

BECOME AN ACT FLEET FORUM MEMBER

Join other leading fleets who use advanced technology to discuss, see, touch, learn, and preview technology. Fleets who participate agree to showcase their own lessons from implementing advanced clean technology projects, actively engage in facilitated discussions, and recommend future topics. Membership recurs annually, cancel any time.

MEMBER PRINCIPLES

- ✓ MINIMUM FLEET SIZE - 100 VEHICLES
- ✓ COMMITMENT TO SHARE CASE STUDIES AT LEAST ONCE ANNUALLY
- ✓ FOUR (4) OR MORE AFV'S IN OPERATION OR ON-ORDER
- ✓ FLEET MANAGEMENT/OPERATIONS PROFESSIONALS *(NO SALES TEAMS)*
- ✓ AGREEMENT NOT TO SOLICIT BUSINESS FROM OTHER MEMBERS

- ✓ EXCLUSIVE ACCESS TO RECORDINGS, SLIDES, LESSONS
- ✓ FUNDING AND POLICY UPDATES
- ✓ MONTHLY WEB DISCUSSIONS
- ✓ 50+ HOURS OF EDUCATION
- ✓ HANDS-ON WORKSHOPS
- ✓ 3 ACT EXPO PASSES *(FULL CONFERENCE PASS - A \$2,025 VALUE)*

ANNUAL MEMBERSHIP BENEFITS
